

C1
(cont.)
system for playing in connection with a game at least a portion of a musical recording, a display that displays information in the form of a question and suggests multiple choice answers to the question, wherein the question relates to the portion of musical recording that has been played, a user interface that enables a user to select an answer from the displayed multiple choice answers, and a scorer for recording the answer selected by the user and determining if the answer corresponds to a correct answer;

wherein the terminal is a jukebox system that includes a storage device that stores a library of musical recordings that can be played in full on the terminal for a fee, and further wherein the library of musical recordings can be updated with additional musical recordings through communication with the server, thereby defining a customized library of musical recordings on the jukebox system;

and further wherein the jukebox system is operable to dynamically select the musical recording for the game from the customized library of musical recordings and to dynamically generate the question for the game based on contents of the customized library of musical recordings stored on the jukebox system.

C2
18. (Amended) The entertainment system of claim 17, wherein the system includes a plurality of said terminals at different locations, each of said terminals being operable to communicate with the server, and further wherein the server is operable to collect performance information on users who play the game on any of the terminals and to send user ranking information to each of the terminals.
